

Orb Energy announces the opening of three more branches in Karnataka

10th December, 2006

Orb Energy ("Orb") today announced the opening of three more branches in Karnataka, from which the company will sell, install and service solar energy systems for back-up power and hot water applications.

Orb is opening branches in Kundapur, Udupi and Shimoga during the period from December 6th to 10th. In total, Orb plans to open 25 branches in Karnataka, and subsequently expand its network nation-wide.

An Orb Energy branch serves as a 'one-stop-shop' for a customer's entire solar energy needs. Orb offers a wide range of solar photovoltaic systems (branded Orb Solectric), solar hot water heaters (branded Orb Sunstream), solar street lighting systems, as well as energy efficient lights, fans and other appliances. Its products are suited to both residential as well as commercial customers.

Damian Miller, the CEO of Orb Energy, in attendance at the inauguration ceremony in Shimoga, said "Orb has generated momentum in its operations and in Karnataka's solar market. Every branch we open will become a landmark in the local community - a place where customers know they can find the best solar products, service, and finance - all easily available under one roof."

Orb expects to invest Rupees 12 crores in India, with plans to build a national branch network to support customers and ensure quality of delivery, installation, and after-sales service. Work with regional banks is also underway to ensure Orb's customers receive attractive consumer finance packages.

As NP Ramesh, Chief Operating Officer of Orb Energy, explained "Today, we opened our fourth branch. By the end of the year, we will have opened a total of 5 branches. By the end of 2007, 15 branches. We are very serious about servicing the demand in India for solar energy, and our commitment is reflected in our growing network of branches."

Customers who are interested in learning more about Orb Energy and its product range were invited by Mr. Ramesh to call their customer care line on 99005 20505 and visit their web-site at www.orbenergy.com.

Over the next five years Orb intends to reach more than 100,000 residential and commercial customers and create more than 250 jobs.
